Ref: Donnie Fritts; Cost of Third Phase of Care

Dear Mrs. Silvers:

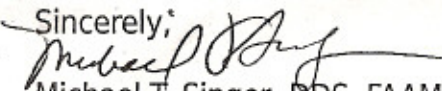

Donnie Fritts has successfully completed the first two phases of treatment. In the first phase, plastic surgery was done. In the second phase Donnie Fritts received implants which will form the base support for his obturator.

The third phase is the fabrication of the gold bar, support system, and obturator(teeth). The cost of this work is \$20,000.00.

The fourth and final phase, fabrication of the nose and facial prosthesis, is done by Mr. Bob Barron. The third phase must be done in such a manner as to provide support for the last phase. The cost for Mr. Barron's work is \$12,500.00.

Please help with these last payments so that we can begin work on the third and final phase of Mr. Fritts' work.

Sincerely,

Michael T. Singer, DDS, FAAMP, FACP
